Harare, Zimbabwe | +263 771 191 220 | munashemachakwa741@gmail.com | Portfolio:

munashemuchinako741.github.io/website | LinkedIn: linkedin.com/in/munashe-machakwa-772a46210

PROFESSIONAL SUMMARY

BTech Honours Information Technology graduate (Harare Institute of Technology, graduated 4 September 2026) currently working as Software Development and Engineering Lead at Terri Technologies, having progressed there from Information Technology Intern through Full-Stack Developer. Experienced across full-stack web development, REST APIs, databases, Odoo customization, and GPS and IoT fleet systems, alongside hands-on IT support work including hardware setup, remote troubleshooting and email system configuration, with a habit of tracing problems through logs and testing until they are properly resolved. Also provide independent, voluntary first-line Odoo support to a finance team. Looking for a Graduate Trainee opportunity in software development, IT support, business systems or AI.

CORE TECHNICAL SKILLS

Programming & Frontend: JavaScript, Java, Python, PHP, SQL, React.js, HTML, CSS, Bootstrap, Tailwind CSS, WordPress

Backend & Integrations: Spring Boot, FastAPI, Node.js, REST APIs, WhatsApp automation, SMS gateways, payment integrations, third-party APIs

Databases & Data: PostgreSQL, MySQL, Pandas, NumPy, scikit-learn, data analysis, stacked ensemble models

Business Systems & Infrastructure: Odoo customization and first-line support, open-source GPS tracking platforms, GPS/IoT diagnostics, hardware setup and repair, remote desktop support (AnyDesk), Jira, Docker, Git, GitHub, Linux, DNS and email authentication (SPF, DKIM, DMARC)

CORE COMPETENCIES

Analytical problem-solving, innovative and creative thinking, integrity, professionalism and ethical conduct, communication and interpersonal skills, effective teamwork, adaptability and willingness to learn, and attention to detail and commitment to quality.

PROFESSIONAL EXPERIENCE

Software Development and Engineering Lead

Terri Technologies, Harare, Zimbabwe

June 2026 – Present

- Lead software and product development from planning through implementation, testing, release and maintenance, providing technical supervision to the team.
- Set project priorities and delivery timelines using Jira, communicate with stakeholders, and support resolution of complex application and infrastructure issues.

Full-Stack Developer

Terri Technologies, Harare, Zimbabwe

September 2025 – June 2026

- Built and maintained web applications, dashboards, backend APIs and databases using React, Java, Spring Boot, FastAPI, Node.js, PostgreSQL and MySQL.
- Integrated payment services, SMS workflows and GPS/fleet data into client business systems.

Information Technology Intern

Terri Technologies, Harare, Zimbabwe

September 2024 – August 2025

- Developed company websites and applications, and built administration dashboards for tracking, speed-limiter and asset-monitoring systems.
- Provided technical support by configuring SPF, DKIM and DMARC, resolving email deliverability issues, and installing, repairing and troubleshooting GPS and IoT hardware across client fleets, including remote support via AnyDesk.

Odoo Support and Module Developer

Paraclete Investments (Independent Volunteer), Remote

August 2025 – Present

- Provide remote first-line Odoo support and develop custom modules for finance and operational workflows, investigating issues through logs and testing, and coordinating with the Finance Analyst.

Inventory Auditor

Primeast Investments Pvt Ltd, Harare, Zimbabwe

November 2021 – February 2024

- Managed inventory records and conducted stock audits across two branches, and trained colleagues on the Point of Sale system, an early grounding in IT support and troubleshooting.

SELECTED TECHNICAL PROJECTS

The Ridge Event Management Portal

Multi-tenant athletics platform covering registration, ticketing, payments, attendance, results and reporting.

Tech: Java, Spring Boot, React, PostgreSQL, Paynow, XPay | theridge.territechnologies.net

Terri Fleet & Asset Management Platform

An advanced vehicle telematics platform build on top of open-source server for real-time vehicle tracking, reporting, device diagnostics and client-specific operations.

Tech: Java, React, PostgreSQL, GPS/IoT devices

Odoo Module Development & Customization

Custom Odoo module development focused on extending business workflows, improving operations and adapting Odoo to client-specific needs, carried out as independent voluntary work.

Tech: Odoo 19, Python, XML, PostgreSQL, ORM, views, models, security rules

EDUCATION

Bachelor of Technology Honours Degree in Information Technology

Harare Institute of Technology, Harare, Zimbabwe | Graduated 4 September 2026

Degree Classification: Pending | GPA: Pending

Official transcript and final degree classification are pending release by the university ahead of graduation; a compiled record of results to date is available on request.
